

ICA 2007: FILM PROGRAM

The Film Program takes place in connection with the 2007 ICA conference, focusing on films related to its theme: Creating Communication: Content, Control, and Critique. This one-day event showcases productions by local independent Bay Area filmmakers and film collectives. The filmmakers and/or representatives from the collectives will also present on their work. These films, examples of alternative and democratizing communication, illustrate the diversification of content creation and distribution within diverse and complex communication environments. The program also highlights the relevance of film as a communication tool and how people, including marginalized voices, participate in the creative process.
